PICUAL VARIETY: The fruit or olive that produces the olive oil ends in a small point or peak. It is a very appreciated variety due to the quality of the oil which is obtained by highlighting the high proportion of oleic acid and polyphenols.

MOSTLY FRUITY GREEN: Attributes of ripe fruits.

Notes of green grass and green leaf that balance each other.

IN MOUTH: there is a balance between bitter and spicy, that confirms that the attributes found in the nose also appear in retronasal smell.
